DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,3-6, 11-13,15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spence'558 or '633.

The applied Spence'558 and '633 disclose substrates treated by placing said substrate in an active gas atmosphere. See Spence'558, column 1, lines10-67 and column 2, lines 10-26; column 3, lines 14-26; claim 31; Spence'633, column 1, lines40-67; column 2, lines 1-40; column 3, lines 1-37; column 15, lines 27-39.

Spence references do not specifically teach that a magnetic layer may be placed on a surface of such substrates.

It would have been obvious to one having ordinary skill in the art at the time of the invention to place a recording layer on the substrates of Spence inventions, since it was known in the art that magnetic recording media having layered structures required substrates.

Art Unit: 1773

3. Claims 2,7-10 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The amendments and remarks filed by applicants on 09-23-03 have been fully considered. The claims, however, remain unpatentable in view of the new grounds of rejection.
